ArcGIS For Local Government – Jump Start Your Implementation

- Do you want out of the box maps and applications that support your business practices?
- Do you want a consistent interface across the entire organization?
- Do you want a rapidly deployed system that is always current?

Today, local government agencies are required to manage their GIS effectively. Many IT managers must now demonstrate a real return-on-investment (ROI) and develop a business case for every investment in technology. When you want to manage your GIS, you want the technology to adapt to your workflow and not the other way around.

ArcGIS for Local Government from “The Local Government Specialist”!

At EI Technologies, we have simplified the implementation process for ArcGIS for Local Government. We are now offering packaged solutions to get your implementation up and running in a record time. We call this our “Efficiency Improvement Booster (EIBoost™)”

EIBoost™ is available in three different packages:

EIBoost™ Lite - This is our most affordable service. As part of this package we will perform a quick data mapping between your current database and the Local Government Information Model (LGIM). Next, we will customize the LGIM if there are any additional features or fields necessary. We will then migrate your data into LGIM. You are now ready to take advantage of everything ArcGIS for the Local Government Information Model has to offer along with ready to use maps and applications.

EIBoost™ Standard - This is our most popular implementation service. As part of this package, you get everything that is outlined in EIBoost™ Lite. In addition, we will also setup up to ten maps for your staff to use from day one. We will also implement two desktop applications and two web applications for ArcGIS for Local Government.

EIBoost™ Premium - This is the most advanced service levels that we offer. As part of this package, you get everything outlined in EIBoost™ Lite and EIBoost™ Standard. In addition, you also get ten more maps and two more desktop applications, as well as three more web applications. With this package, you also get an unlimited license to our CAMPS™ suite of products.

EI Technologies, LLC

Experience. Expertise. Execution.

Passionate About Quality | Committed to Customer Service

Select an experienced GIS consulting firm for your next project!
