

# Innovative GIS Solutions for Government and Industry

## Why your agency needs high-quality geospatial data

- Does your GIS have data quality issues?
- Does your geospatial data allow your staff to deliver superior customer service to citizens and business in your community?
- Does your staff have confidence in your geospatial data?
- Is the quality of your geospatial data exceptional?

If you have any doubts about these issues, then EI Technologies, LLC can be of service to your organization. Today, local government agencies are required to use geospatial data for a myriad decision-making purpose. Our local government clients use GIS to resolve property ownership issues and prepare for natural disasters using geospatial data.

Public utilities use geospatial data to manage their water and wastewater assets. And our electric utilities clients use geospatial data to manage their distribution and transmission networks.

## EI Technologies' Data Conversion / Migration Service is the solution!

EI Technologies believes that high-quality geospatial data is key to the implementation of a cost-effective enterprise geospatial decision support system. Our GIS consultants and conversion technicians have the experience and expertise to populate your GIS with up-to-date and accurate geospatial data. EI Technologies' Data Conversion/Migration Services can convert your source data into complete and accurate representations of your transportation network, your water/wastewater/sewer infrastructure, and parcels framework.

First, we develop customized data models to efficiently store and manage your street centerlines, parcels, water, sewer, and other land based features. Next we use our seventeen years of GIS experience to migrate, transform and load your source data into an ArcGIS-ArcSDE using Oracle, SQL Server or your preferred database management system. Then we use our proven 7-step quality control process to ensure that every feature in the geodatabase is accurately captured and loaded into your geodatabase using an approved data model.

*Passionate About Quality | Committed to Customer Service*

### Benefits of EI Technologies' Data Conversion/Migration Services

EI Technologies can convert or migrate your source data into ArcGIS/ArcSDE-compliant data from:

- Hardcopy maps
- ESRI coverage's and shapefiles
- Digital aerial photographs
- AutoCAD and MicroStation as-builts
- Field records and notes
- Deeds and other property records
- GPS data
