

# Innovative GIS Solutions for Government and Industry

## Why your organization needs an effective Project Management

- Are your GIS projects completed on time?
- Are you concerned about cost over runs on your GIS projects?
- Do you get repeated change orders from your GIS vendors?
- Are you eager to show progress to the management on your GIS projects?

Today, local government agencies are required to do more work with fewer and fewer people. GIS specialists want to use the system to address real-world issues but there is less and less time to do so.

If you have any doubts about the above issues, then EI Technologies, LLC can be of service to your organization.

## EI Technologies' Project Management is the solution!

The success of GIS projects relies heavily on the project lead's ability to control costs and provide high-quality services and products on schedule. Having completed more than 200 GIS projects in the past 17 years; EI Technologies has gained the experience to successfully manage GIS projects ranging in scope from small two-person Needs Assessment and Implementation Planning projects to the implementation of enterprise GIS infrastructures involving tens of GIS consultants and technicians on a global basis.

EI Technologies' project managers use the principles of the Project Management Institute (PMI) as described in the Project Management Book of Knowledge and industry standards for the design and development of software applications, information security, and other technical products. Our project managers track project deliverables, expenses, resources, and schedules using such tools as Microsoft Project and proprietary project management system.

The success of our projects is ensured through the creation and execution of project plans that document the activities and tasks associated with each project from the time of project inception to closure. Our project managers know exactly what tasks are being worked on at any time and the status of every project deliverable.

## *Passionate About Quality | Committed to Customer Service*

### Benefits of EI Technologies' GIS Consulting Services

EI Technologies will explore assess, and report on these key areas of your GIS:
