

Innovative GIS Solutions for Government and Industry

Why your organization needs an effective Staff Augmentation

- Are you or your GIS technician being as productive as you can be?
- Does your map maintenance activities take longer than you expect?
- Are your technicians spending more time maintaining data than analyzing them?
- Is the security of your geospatial data in doubt?

Today, local government agencies are required to do more work with fewer and fewer people. GIS specialists want to use the system to address real-world issues but there is less and less time to do so.

If you have any doubts about the above issues, then EI Technologies, LLC can be of service to your organization.

EI Technologies' Staff Augmentation is the solution!

There never seems to be enough help to get projects and tasks done on time. When this is the case with our clients they call us for outsourcing support.

EI Technologies can provide regular and on-call staffing to your organization in certain parts of the world. Your organization can arrange to have an experienced GIS analyst onsite for one or two days, or longer. Analysts can be onsite on a designated day(s) of each week or be on-call to support your GIS activities as needed.

EI Technologies' analysts provide such services as map production and data maintenance. They can perform the same tasks every week or work on various projects and tasks assigned by your staff.

EI Technologies provides GIS analysts skilled in the use of ArcGIS, GeoMedia, SQL Server, Access, and other GIS-enabling technologies. They have on average thirteen years of industry experience.

EI Technologies provides the training and administrative support for contract personnel. On the days they are not onsite they work on other projects for our valued customers, keeping their skills sharp and remaining proficient in the software products used by your organization.

Passionate About Quality | Committed to Customer Service

Benefits of EI Technologies' GIS Consulting Services

EI Technologies will explore assess, and report on these key areas of your GIS:
